

Lessons learned in digital health for chronic disease management

Thursday 5 August

3-4pm (AEST) | Zoom Webinar

[REGISTER ONLINE](#)

Digital interventions for chronic disease management are evolving rapidly in line with increasingly capable and pervasive technologies. Prof Ralph Maddison from Deakin University's Institute for Physical Activity and Nutrition will discuss lessons learned from research across a broad spectrum of digital health interventions including SMS, web services, mobile apps, and IoT.

A panel discussion will then engage the audience, reflect on key messages, and consider future directions for digitally-enabled chronic disease management.
